GROUP INTERNATIONAL

A LEGACY OF CRAFTSMANSHIP

SINCE 1979

Founded in Europe, Ital Design Group International has developed into a trusted European manufacturer of premium office furniture, known for its precision, durability, and refined design.

With vertically integrated production and continuous investment in advanced technology, the company delivers high-performance workspace solutions tailored to modern business environments.

Today, Ital Design serves international markets and maintains long-standing partnerships with major institutions, reflecting its commitment to quality, reliability, and long-term value.

We bring your vision to life, delivering end-to-end solutions with personalized design consulting and dedicated one-on-one project management.

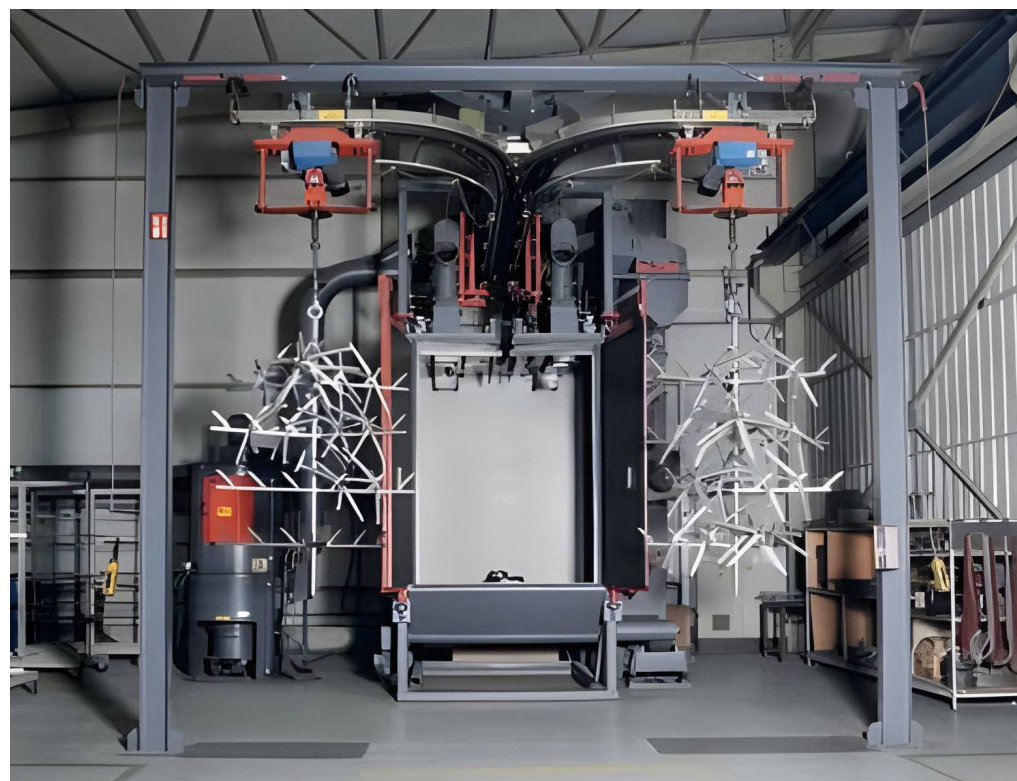

PRODUCTION FACILITIES

Our vertically integrated facilities are equipped with state-of-the-art machinery across a range of specialized disciplines.

- Aluminium die-casting
- Metal component production
- Mold development (via our sister company K.E.M)
- Plastic & polyurethane injection
- Seating & upholstery manufacturing
- Steel processing & coating
- Wood processing & finishing

Ital Design is Europe's largest office furniture manufacturer, distinguished by its scale of infrastructure, advanced technology, extensive facilities, and production capacity - ranking among Europe's leading companies.

GLOBAL LEADER IN SUSTAINIBILITY

In 2024, Ital Design
achieved LEVEL 3 certification
for its products - the highest
sustainability rating in the industry.
Only 25 manufacturers worldwide
hold this distinction.

TOTAL QUALITY MANAGEMENT SYSTEM

For over 25 years, Italcasa has implemented a Total Quality Management system aligned with its structure and product portfolio, continuously evolving through the integration of leading global technologies and scientific advancements. This commitment underscores a long-term focus on excellence, innovation, and responsible growth.

The system ensures consistently high standards across all operations including: product and service quality (ISO 9001), environmental stewardship (ISO 14001, EMAS, FSC), workplace health and safety (ISO 45001), and energy efficiency (ISO 50001).

COLLECTION OVERVIEW

Ital Design presents an integrated portfolio of contemporary workspace solutions designed to support the evolving needs of modern professional environments. From executive systems and collaborative workstations to acoustic solutions and lounge collections, each collection is developed with a focus on performance, flexibility, ergonomics, and refined aesthetics.

Defined by clean architectural lines, premium materials, and precision manufacturing, the collections work together to create cohesive environments that enhance productivity, comfort, and spatial identity.

All solutions are fully customizable: you can mix, match, and create a collection uniquely tailored to your space and style.

SYNTHEKA®

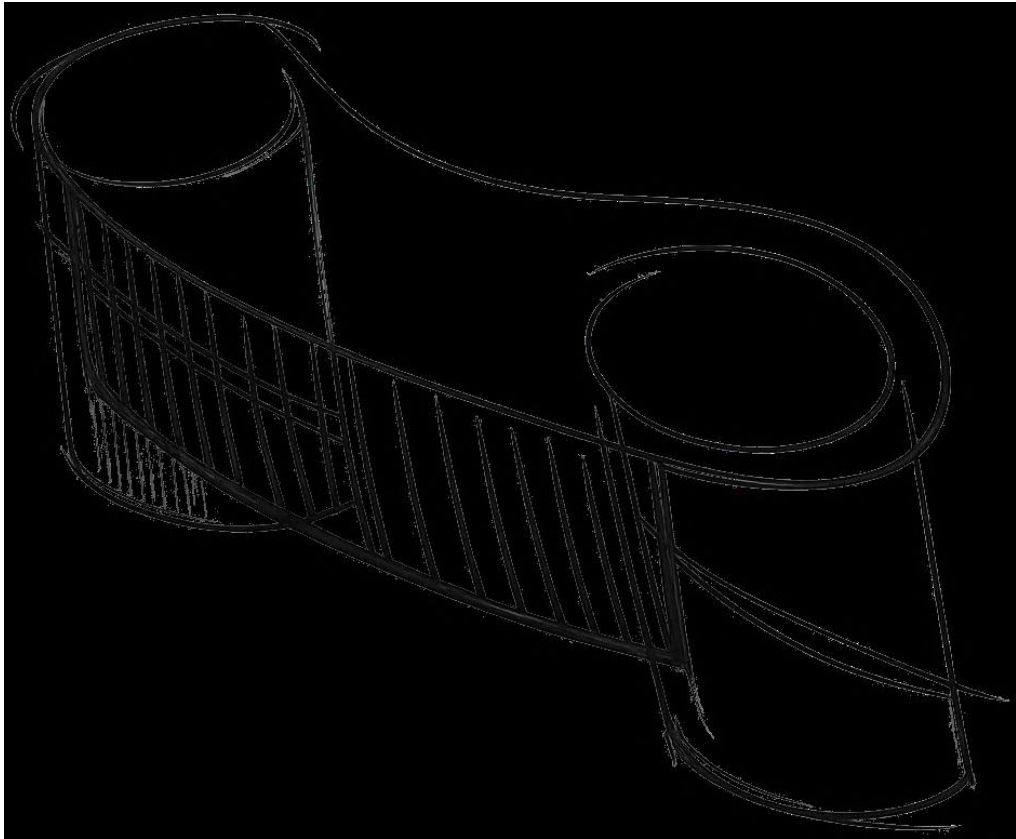

ANASA® COLLECTION

Inspired by Ancient Greek Design.

The ANASA® executive desk is designed to balance simplicity with functionality. Inspired by the rhythm of breathing, it combines clean lines and subtle curves to create a professional and organized workspace.

ANASA® brings a sense of calm and prestige to any office, supporting a focused and product atmosphere.

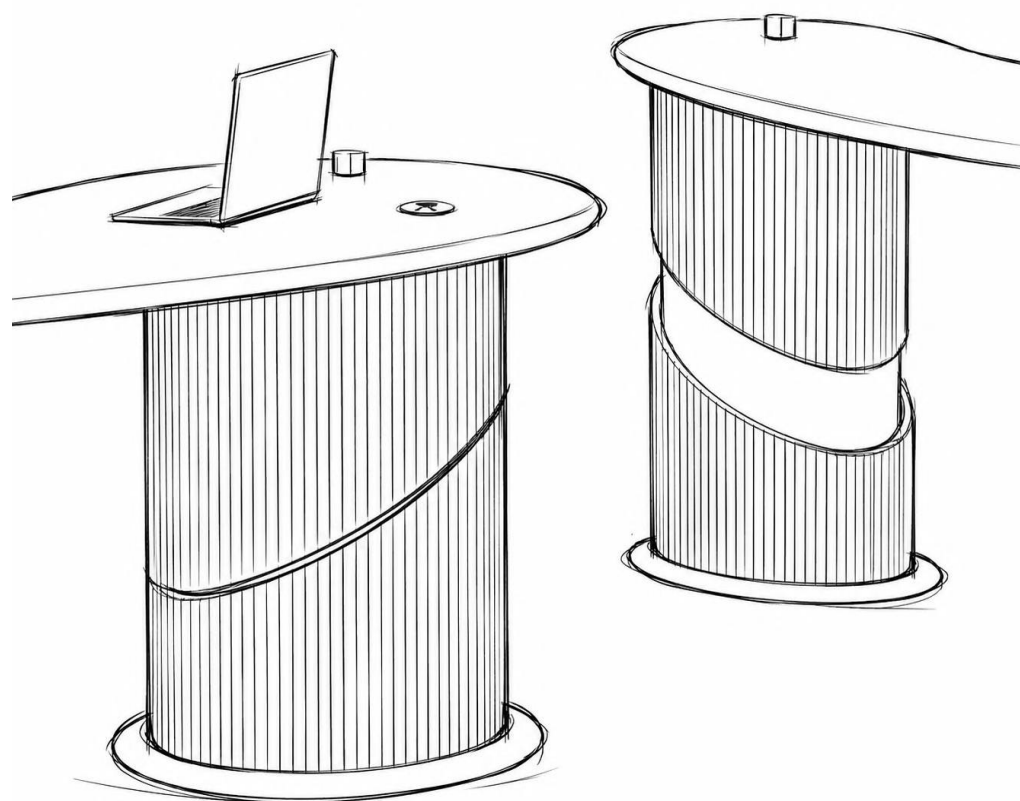

(ANASA® is internationally patented by Ital Design) .

ANASA® Height-Adjustable Executive Desk

The ANASA® executive desk brings a fresh perspective to the workplace, seamlessly blending refined aesthetics with advanced ergonomics. Featuring an electric height adjustment mechanism, it offers unparalleled comfort and adaptability. With just a simple adjustment, the desk accommodates the user's preference for working either standing or seated.

The ANASA® executive desk is designed to balance simplicity with functionality. Inspired by the rhythm of breathing, it combines clean lines and subtle curves to create a professional and organized workspace.

ANASA® Conference Table

The ANASA® conference table is designed to elevate collaboration through balance, presence, and refined form. Its sculptural base and soft, flowing lines create a strong yet elegant focal point, shaping a space that encourages dialogue and confident decision-making. With generous proportions and premium materials, it delivers both functionality and visual impact, adapting seamlessly to meetings of any scale.

The ANASA® conference table is available in two versions: the regular conference table for larger meeting spaces and the round table for more compact, open, and collaborative settings.

ANASA® Auxiliary Table

A circular table designed to elevate reception and lounge spaces through simplicity and elegance. Its refined geometry and solid base create a strong yet discreet focal point, combining functionality with a warm, welcoming presence.

The ANASA® series is available in two versions: **Silence** for a fixed setup, and **Height Adjustable**, for added flexibility.

ANASA® Cabinets

An elegant composition of balance and flow, the Anasa cabinet brings a sense of calm and refinement to the workspace. Soft curves and precise detailing create a seamless connection between aesthetics and function, forming a piece that feels both natural and purposeful.

LYSIS PLUS COLLECTION

Executive Presence.

Affordable luxury and versatility are the irresistible features of the LYSIS PLUS executive series. The wide range of options for the composition of the office gives an air of uniqueness to you and your space. LYSIS PLUS combines melamine chipboard with glass or metal, creating a refined and versatile composition. The different materials blend together harmoniously, giving a distinctive style to the work environment.

SLIM COLLECTION

Light Structure. Refined Versatility.

The SLIM collection is defined by clean geometry, refined detailing, and a versatile material palette. Available in wood and glass, slim stainless-steel structures and seamless connections create a workspace that feels both visually light and architecturally precise.

Available with wood or glass tops for a lighter, more customized executive look.

Slim Y Round Table

The SLIM series offers a modern and eco-conscious solution for office spaces. With a wide range of materials, colors, and sizes, it adapts easily to different interiors. Its simple yet dynamic design is enhanced by a sleek glass surface.

Value Visitor Chair

An elegant and comfortable visitor's chair proposal! VALUE has a single, height-adjustable, rotating frame upholstered in fabric or leatherette. The elegant effect is completed by the five-star, polished aluminum base and the nickel-plated support arms.

ALMA COLLECTION

Dynamic Comfort. Everyday Balance.

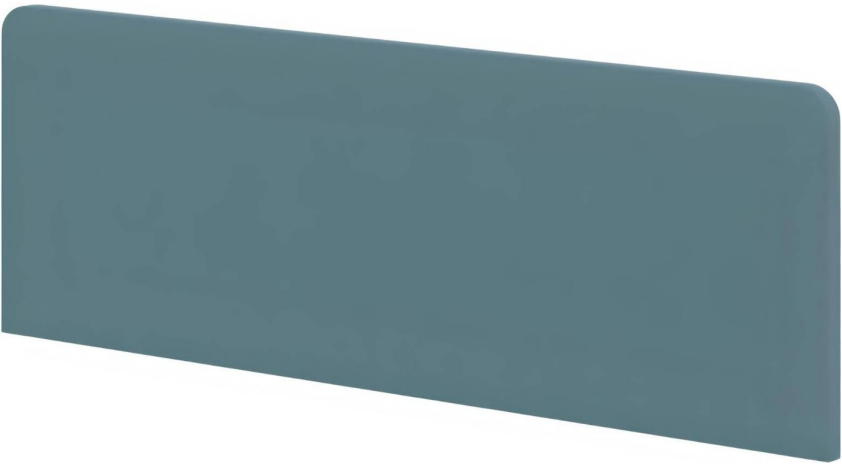

Improve health and well-being during work – studies show that being able to switch between standing and sitting positions significantly reduces fatigue, pain and back problems. In the standing position, the load is shared between the ligaments of the vertebrae, in the sitting position the intervertebral discs bear the greatest load.

Built for Flexible Work

Alma supports different working preferences with a clean adjustable structure, making it suitable for focused individual work, shared offices, and modern workstations that need to adapt throughout the day.

TETRA Partition

Refined tabletop partitions designed for flexible composition across materials and finishes, with seamless, integrated support.

Smart Position Control

Easily adjust and store height settings with a simple touch, supporting ergonomic comfort and personalized work positions with the Smart Position Control.

NEO COLLECTION

Clean Lines. Modern Simplicity.

The NEO series is characterized by simplicity and modern design. It is ideal for spaces that require a modern aesthetic approach. It impresses with its simple, clear design expression as well as its high quality. The profile of the series is completed by the optically floating work surface above the metal support frame. With the ability to customize color and size, the NEO desks are adaptive to any interior space.

Integrated Cable Management

Designed to keep workstations clean and organized, with built-in cable management that helps route wires neatly below the surface for a more refined and clutter-free workspace.

TETRA COLLECTION

Unified Design. Lasting Performance.

The TETRA collection delivers clean, modern workspace solutions designed for performance and flexibility. Combining executive desks and conference tables within one cohesive system, it creates a

unified and efficient environment across all office settings. Combining refined materials with a streamlined design, TETRA delivers a practical yet elevated solution for modern workspaces.

TETRA Cabinet

Crafted from high-quality melamine, these cabinets combine durability with refined aesthetics. A versatile selection of dimensions, colors, and accessories allow for seamless integration into any space.

REFLEX COLLECTION

Adaptive Comfort. Fluid Support.

An innovative office chair designed to move with the user, defined by its distinctive 3D support back that follows natural body movement in every direction — forward, back, and side to side. Combining breathable mesh or upholstered finishes with an ergonomically contoured seat, it delivers comfort and adaptability throughout the day. Advanced features such as 4D-adjustable armrests, adjustable seat depth with multiple positions, and an optional height-adjustable headrest create a fully customizable seating experience, meeting the demands of a modern, high-performance workplace.

ANAFI COLLECTION

Clean form. Natural comfort.

A contemporary seating solution defined by simplicity, flow, and comfort. Its clean lines and soft curves create a light, balanced form that integrates seamlessly into modern work environments. The mesh seat and backrest enhance breathability and freedom of movement, while the RELAX mechanism supports smooth reclining and natural posture shifts throughout the day.

Mesh seat and backrest for breathability

ALIS COLLECTION

Comfort. Clarity. Presence.

A special sofa should attract admiration and attention. The ALIS sofa has an innovative design as its dynamic character steals impressions and is always at the center of trends. It is built to provide maximum seating comfort and withstand hard use. It is the ideal choice for quality professional reception areas, lobbies, and more.

Slim profile with a strong architectural presence.

NIDO COLLECTION

Quiet Retreat.

The NIDO sofa collection is designed for contemporary open-plan environments, offering a refined balance between comfort, privacy, and performance. Its enveloping form, defined by generous surfaces and integrated acoustic materials, creates semi-private zones that enhance focus while maintaining a welcoming, social atmosphere. Engineered to reduce reverberation and improve spatial acoustics, NIDO transforms busy workplaces into more comfortable and efficient environments, combining functional innovation with clean, modern design.

High-back acoustic seating that creates privacy and focus in open spaces.

ACOUSTIC PANELS

Quiet Spaces. Clear Thinking.

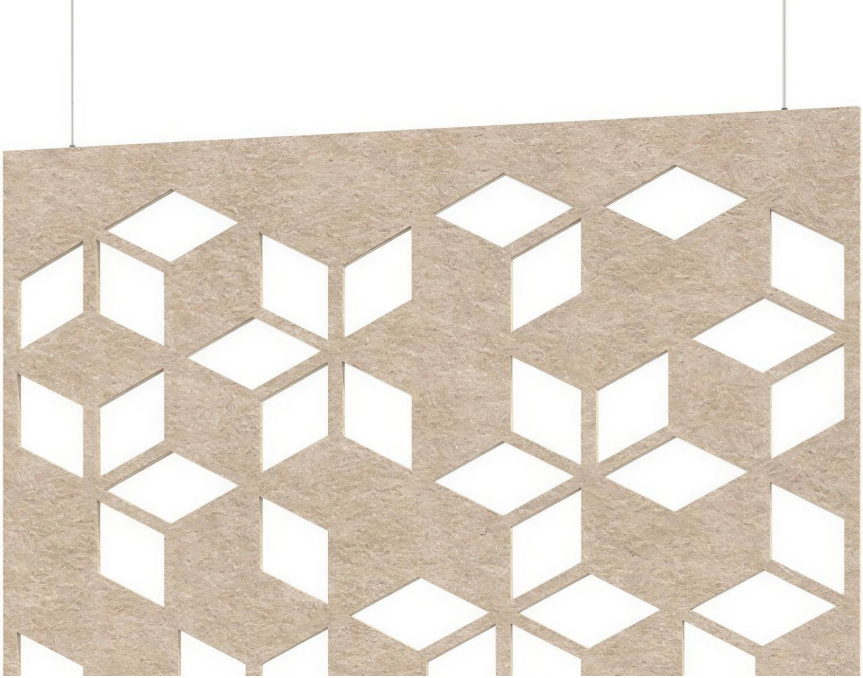

Ital Design acoustic systems provide optimal sound absorption across walls and ceilings, improving room acoustics by reducing noise and controlling reverberation. Made from 100% PET at 18mm thickness, they combine high performance with contemporary design, available in a range of colors and patterns to create a more comfortable and harmonious workspace.

Mono Partitions

High-performance acoustic partitions designed to reduce noise and create focused, private work areas within open environments.

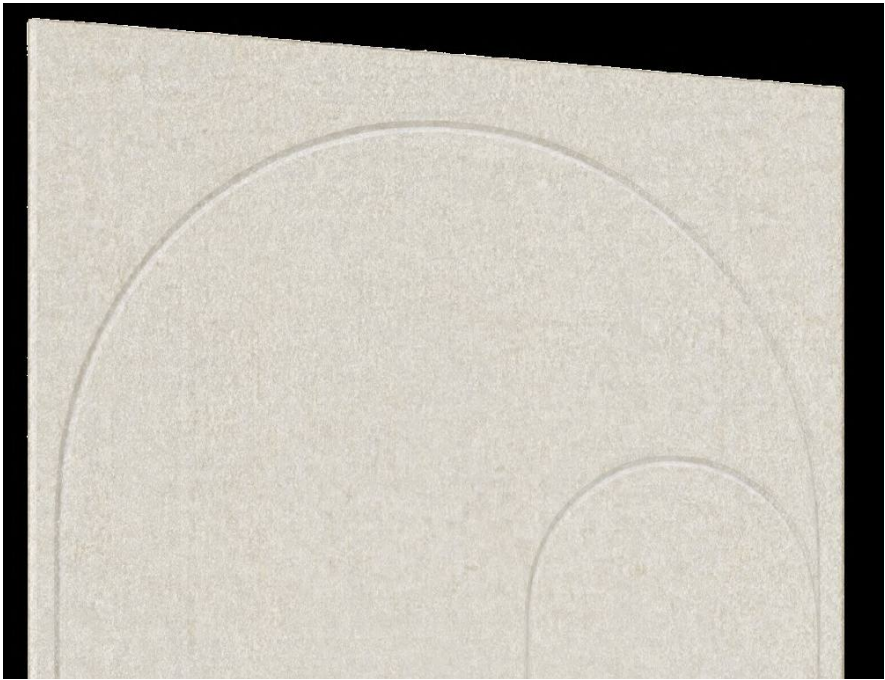

Suspended Acoustic Panels

Suspended acoustic panels made from 18mm PET help absorb sound, reduce reverberation, and create a quieter, more comfortable workspace while adding a modern decorative feature to the interior.

Forma Plus

A modern lounge chair featuring fluid lines and curved surfaces, merging contemporary design aesthetics with ergonomic functionality.

Suspended Acoustic Panels

Wall acoustic panels made from 18mm PET improve sound absorption and reduce reverberation while adding color, texture, and a refined decorative element to interior spaces.v

Milos

A welcoming and stable chair with soft curves and ergonomic support, designed to bring comfort, simplicity, and a clean visual presence to professional spaces.

MODULAR ACOUSTIC BOOTH

Private Space. Clear Thinking.

A self-contained acoustic solution designed to create focus within open environments. Defined by its clean geometry and transparent structure, the booth provides visual openness while delivering effective sound

insulation for meetings, calls, and private work. Integrated lighting, ventilation, and ergonomic interior elements ensure comfort and usability, transforming any workspace into a more flexible and efficient environment.

SIMPLE Stools

A minimalist, mobile seating solution designed for flexibility and ease. Lightweight, with an integrated handle and wheels with brake, it moves effortlessly across any workspace.

SYNTHEKA® COLLECTION

Private Space. Clear Thinking.

The modular shelving system SYNTHEKA® is a modern solution for the workplace, designed to foster collaboration. Its innovative modular construction

allows for easy, tool-free assembly while enabling effortless customization and expansion. The sleek, minimalist design compliments any workspace.

(SYNTHEKA® is internationally patented by Ital Design).

PAST PROJECTS.

A high-performing workplace where clarity, flexibility, and brand identity come together within an iconic architectural setting.

CENTRIC BRANDS

EMPIRE STATE BUILDING, NEW YORK

Client Centric Brands **Space** Corporate headquarters, multi-functional office **Scope** Workstations, executive offices, meeting rooms, collaboration areas **Year** 2025-26

Set within the iconic Empire State Building, the workspace reflects a dynamic and collaborative environment where clarity, flexibility, and performance define the design. Structured workstations are combined with open layouts to support both focused work and team interaction, while integrated meeting spaces and refined materials create a cohesive, modern workplace aligned with their global identity.

June 25, 2025

To whom it may concern,
it is my pleasure to provide this letter of recommendation for Ital Design.

Our company engaged Ital Design to provide office furniture, reception areas and custom cabinetry, this includes delivery and installation in our New York and LA offices. Ital Design managed the project through completion, they demonstrated exceptional professionalism, attention to detail, and a commitment to delivering high-quality work.

New York city presents unique logistical challenges, but Ital Design managed the project seamlessly. Materials arrived on time, installations were completed as scheduled, and the entire process was remarkably smooth. In addition to their outstanding performance, their pricing was fair and competitive, providing excellent value for the quality of work delivered.

Based on our experience, I'd recommend Ital Design without hesitation to any company seeking a reliable, talented, and professional design and installation partner. We were extremely pleased with the finished project and would gladly work with them again in the future.

Sincerely,

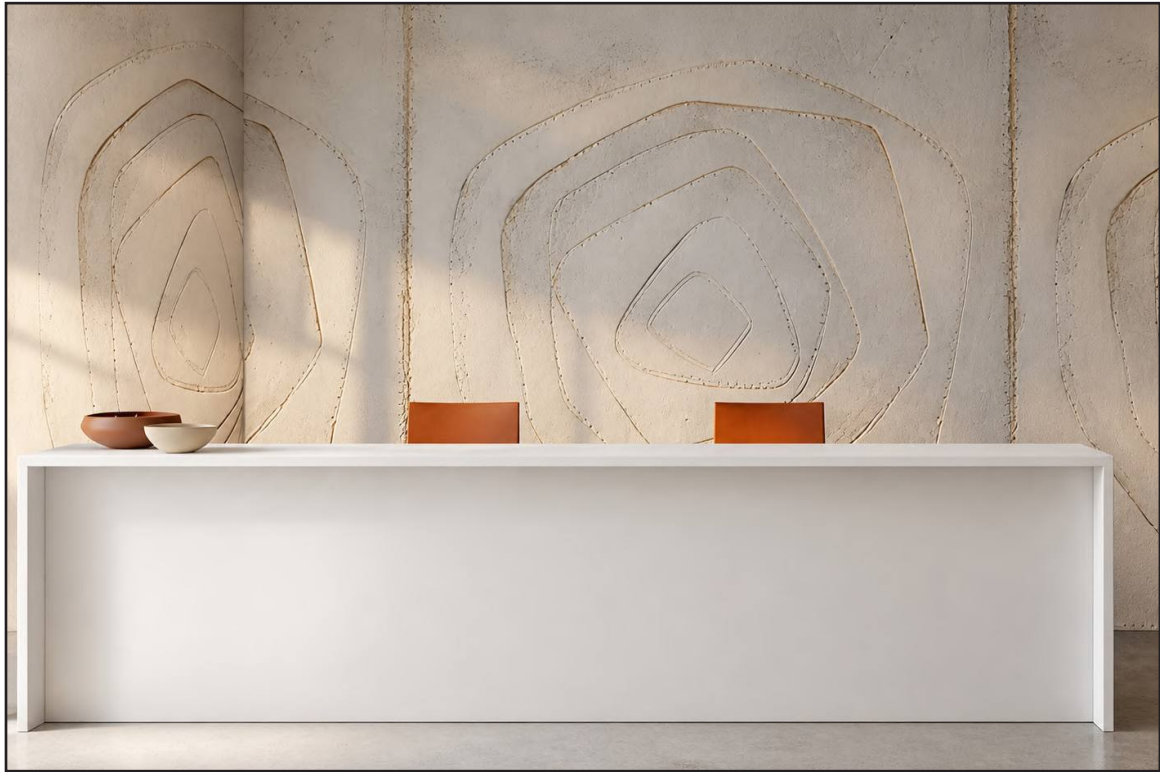

Merton Owens

A fully integrated workspace, where design, precision, and execution come together seamlessly.

CAMILLO FAMILY OFFICE

HOUSTON, TEXAS

Client Camillo Family Office **Scope** Full corporate interior solution
Design Ital Design Group + Euro Design Group
Year 2024

A fully integrated headquarters designed and delivered as a complete turnkey solution, from concept to installation. The project brings together executive offices, meeting rooms, workstations, and reception areas into one cohesive environment, balancing functionality with refined aesthetics. Clean architectural lines, custom layouts, and tailored furniture solutions create a structured yet elegant workspace, reflecting the professionalism and identity of a modern family office while ensuring efficiency across all departments.

Client Recommendation and Project Testimonial
Ted Platon and Ital Design Group

June 2026

To Whom It May Concern:

I am pleased to recommend Ted Platon and Ital Design Group based on my direct experience working with Ted on two significant multi-million-dollar projects while serving as Chief Financial Officer of Camillo Companies, a leading Houston-based homebuilder, multifamily developer, and real estate company.

I first met Ted in 2008 and came to regard him as one of the industry's most knowledgeable resources on modern European design and emerging residential and commercial design trends.

Our first project was The Keegan at Mission Glen, a 408-unit multifamily community in Katy, Texas. We selected Ital Design Group to provide and install contemporary Italian kitchens and bathroom cabinetry throughout the development. During the COVID-19 supply-chain disruptions, Ted and his team delivered ahead of schedule, demonstrating exceptional planning, procurement, logistics management, and execution. The finished product remains a defining feature of the community.

The project's success led us to engage Ted on the complete renovation of our approximately 51,000-square-foot corporate headquarters in Houston. Ted served as both a strategic advisor and design partner, providing furniture, millwork, office systems, and workspace solutions. Despite ongoing industry-wide supply-chain challenges, his team again delivered ahead of schedule.

Ted's ability to combine design excellence with practical execution distinguishes him in the industry. Having worked with him on both projects, I recommend Ted Platon and Ital Design Group without hesitation to anyone seeking a trusted partner capable of delivering exceptional design and reliable project execution.

Sincerely,

George Trevino
Principal Advisor, Portfolio Pro Advisors
